

IMPORTANT INFORMATION

In order to give you as much information about our apartment before you make your decision, we want you to know the following.

The apartment consists of two sections:

- a living area combining kitchen, living room and bedroom
- a bathroom

The living room is furnished with a sofa bed, a coffee table with two chairs and a desk with chair.

The kitchen is equipped with fridge/freezer, a hob with 2 hotplates, a mini oven, a kettle, a flat toaster plus utensils, crockery and cutlery.

In the bathroom there are two cupboards and a laundry closet.

The bedroom is equipped with 2 single beds and a lamp at each side. There is a baby cot as well.

Outside there is an additional bed for sleeping.

On the terrace we have a both a round and 2 square tables with two chairs, plus two sun beds.

The **water and electricity infrastructure** that provides your services in the apartment is less reliable. There are (now very rare) power cuts, and sometimes there are problems with the water, but usually it only takes up to an hour for it to return. The water from the tap is drinkable.

There is free wireless Internet for you.

SMOKING IN THE APARTMENT AND ON THE SITE IS STRICTLY PROHIBITED.

NO OPEN FIRES are allowed on the site under any circumstances, as this constitutes a fire hazard in this area all year round.

There is no parking inside the site. Outside the gate, there is a space marked "private parking" for parking.

You will take over the apartment in a clean state, and we will provide for cleaning by the end of the lease. If you are staying for more than one week, we will provide for a light cleaning after a week's stay. Each week bedding and towels will be changed.

The nearest town with shopping facilities is Paleochora (5 km).

In Anidri village the old school is working as a café with very lovely food and **free Internet**.

Just outside our gate the road leads right down to the path of Anidri gap - a hike of approximately 2 km towards Anidri beach at the Libyan sea.

There are ample opportunities for hiking in the area.

There is literature and maps in the apartment where you can find further information about possible holiday activities in the area.

Once a week one of our good friends Vasilis or Thomas will come and see to the garden.

Our garden watering system is working at nights 3, 4 and 5 o'clock. You might hear it, if you are light sleeper.
